2. In this example, we will work with a package of 5 consisting of one single service. Type in a name for this series and then using the drop down under 'For Service,' select the service you wish to assign to this series.

3. Generally speaking, Series provide the ability to purchase multiples of the same service at a discounted price. After entering the quantity of the service, you can either manually adjust the 'Value Each' field to represent the discounted value of each service, or you can just type in a new 'Total Price' and it will automatically adjust the 'Value Each' field. *Please note, commissions setup as a percentage will be based upon the 'Value Each' and not the full stand-alone price.

4. The process is the same if you wish your Series to consist of more than one service. You can have up to 5 different services per Series. The quantities of each service do not have to match. In this example we could have selected 5 Manicure's and only 2 Pedicure's if we had wanted to.
