

DARCI Christmas Campaign

In this tutorial we will cover creating an email campaign using the Christmas template. These same instructions also work for the Easter, Father's Day, Halloween, July 4th, Mother's Day, New Years, St. Patrick's Day, Thanksgiving and Valentine's Day templates because they all have the same calendar date each year.

1. From the main screen, click DARCI

2. Click 'Email Campaigns'

3. (A) Select the 'Christmas' template from the drop down.

(B) Make this template active by clicking the 'Active' box.

(C) Select how many email messages you would like to send out. In this first example we will just choose 1 but we will come back to this at the end to explain what more than one would look like.

(D) Choose how many days in advance of Christmas (December 25th) you would like this email to go out. In this example we will choose 7 which means your client will receive this email on December 18th.

(E) Click the '1st Message' button to begin setting up your email message.

The screenshot shows the 'Blast Marketing Messages' interface. It features a header 'Blast Marketing Messages' and a main content area. On the right side, there are three buttons: 'Exit', 'Save Template', and '1st Message'. The '1st Message' button is highlighted with a red box and labeled 'E'. In the center, there is a section for 'Email Message' with a 'Template' dropdown menu set to 'Christmas', labeled 'A' with a red arrow. To the right of the dropdown is an 'ACTIVE' toggle switch, labeled 'B' with a red box. Below the template section, there is a 'Number of campaigns to run' dropdown menu set to '1', labeled 'C' with a red arrow. To the right of this is a text box that reads 'Messages will be sent out based on the number of Days in Advance. Select 0 to send the message out the day of the event.' Below this text box is a 'Days in Advance' dropdown menu set to '7', labeled 'D' with a red arrow. The '1st Message' button is also labeled 'E' with a red arrow.

4. (A) Choose the font and size you would like for your message.

(B) These are the codes you can use to insert specific information into your message. For example, by typing "Merry Christmas <CF>!" into the subject line it will display the customer's first name automatically ie. "Merry Christmas Stephen!"

(C) Choose the font color (this is black by default)

(D) Choose the font's background color (this is white by default)

(E) Inserting a hyperlink allows you to enter a website's URL into the message but also have it display a different message than the URL (ie. Click Here to be taken to your businesses' website)

(F) The image button will allow you to insert the URL to a specific image and have it display in your message directly from the internet. If the image resides on your computer, you can simply drag and drop it into this screen and it will automatically display.

Set Message and Image

message number: 1

Subject
Merry Christmas <CF>!

5. The Table Wizard allows you to customize the format of the message box from one square up to a 6x8 table. In this example we will use a 2x2 table.

6. You now have up to 4 different images/text boxes to use when making your campaign email.

7. In the example below, we have dragged two images that were on our computer into the “A” and “C” boxes and then typed corresponding messages into the “B” and “D” boxes.

9. If you wish to send more than one message, you can change the 'Number of campaigns to run' to a number larger than 1. In this example, we've chosen 2 and set the 1st Message to be sent 7 days before Christmas (12/18) and the 2nd Message will be set to 0 which means it will go out on Christmas day. You must configure the 2nd Message in the same manner you did the first.

Blast Marketing Messages

Email Message

Template: Christmas

ACTIVE

Exit

Save Template

Number of campaigns to run: 2

Messages will be sent out based on the number of Days in Advance. Select 0 to send the message out the day of the event.

1st Message: 7 Days in Advance

2nd Message: 0 Days in Advance

10. Please note that all campaigns go out at the same time each day as your appointment reminders. This is setup in the main DARCI screen.
