

Retail Sales

Creating a retail ticket without an appointment

1. Click the Sales button from the main screen.

2. Click 'On File' if the customer you are checking out already exists in your database. This will bring up the client selection screen. Click 'New' if you are going to add this client into your software before checking them out. Click 'Walk In' if you do not plan on tracking any of this client's information or history.

3. Click 'Retail.'

5. The second option would be to use the Manufacturer, Category and Products dropdowns to narrow down your search to products that only meet the criteria you've chosen.

The screenshot shows a 'PRODUCT SALE' interface. At the top, there are radio buttons for 'Sku' (selected), 'Upc', and 'Vendor'. To the right are 'Add To Cart' and 'Checkout' buttons. Below these are a 'Search' button and the product name 'Peachy Keen Butter' with 'QOH = 50'. A table-like structure shows 'Product Number' (3650), 'Qty' (1), 'Price' (25.00), and 'Sale By' (Salon Sale). A red box highlights three dropdown menus: 'Manufacturer' (Aveda), 'Category' (Skin Care), and 'Products' (Peachy Keen Butter).

6. The third option is to click the 'Search' button which will bring up a search box where you can locate the product by name.

The screenshot shows the 'PRODUCT SALE' interface with a 'PRODUCT SEARCH' modal open. The modal has a 'Search String' input field and a 'Start Search' button. The 'Search' button on the main interface is highlighted with a red box.

7. Once you have located your product, enter the quantity and who this product was sold by (for commission purposes if applicable).

10. Select a payment type. In this example we will choose Credit Card.

11. If this customer wishes to charge a credit card they already have on file with you, select 'Card on File' before clicking the 'Process' button, otherwise just click 'Process.'

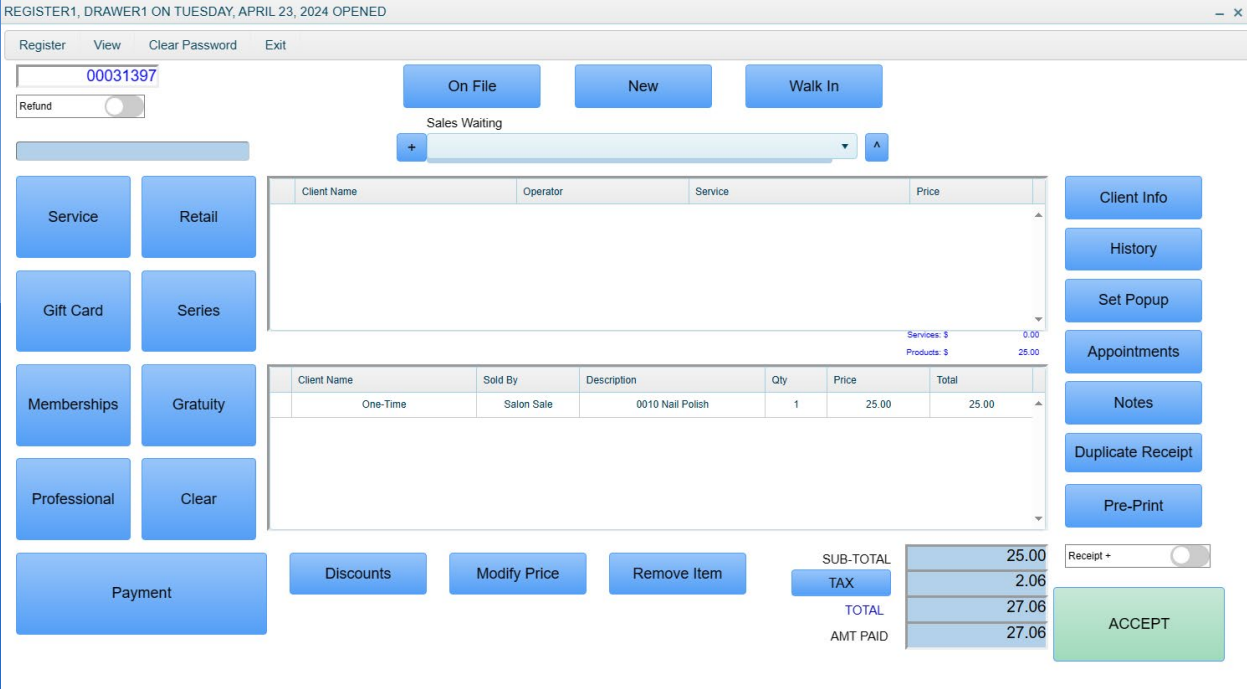

12. Follow the prompts on your credit card device to charge the card.

13. Once you receive the on-screen approval code, click the Accept button.

14. Lastly, click the 'Accept' button to finalize the transaction.

15. Note* If the customer will be paying by multiple payment types, you will be brought back to the payment type window after applying each method of payment until the full balance owed is paid at which time you will be taken back to the final sales window where you can then click the 'Accept' button.
