

Service Add-Ons

This document will show you how to setup Add-Ons for your services. These add-ons can be used as an additional step to a pre-existing service that adds time or an enhancement to a treatment that gives a more deluxe experience.

1. Go to the Set-up -> Salon Services

2. In this screen you can either select a previously created group and service to use as an add-on, or you can make a new one as your “add-on” service.
